OCTOBER 4-10

WORLD SPACE WEEK 2024

SPACE & CLIMATE CHANGE

World Space Week 2024, taking place from October 4th to October 10th is a global celebration of space science and technology. This year's theme, "Space & Climate Change" emphasizes the critical role that space exploration and satellite technology play in understanding and addressing climate-related challenges on Earth. It highlights the importance of space in observing Earth's climate system, monitoring environmental changes, and supporting sustainable actions for the future.

The focus of World Space Week-2024 is to raise awareness about how space-based observations and technologies contribute to climate science and environmental monitoring. By showcasing the intersection of space and climate change, the event aims to highlight innovative solutions and inspire action towards a sustainable future.

Students from various schools, colleges, universities and research institutions are encouraged to participate in the various events planned as part of WSW 2024.
